METTLER TOLEDO

bC model family
Quality. Innovation. Cost-effectiveness.

METTLER TOLEDO's bC scale family is characterized by high-performance, future-proof weighing technology, which is the perfect accompaniment to your operational and sales procedures. Indeed, this is what makes our solutions such a cost-effective option.

Is the result correct? When we talk about results, we are thinking along the same line as you. Not as a weight, but as money. As partner and supplier to your retail business, our aim is to increase the efficiency and performance of your operation by means of practical weighing solutions. You will be impressed by these solutions day in, day out, since they prove highly cost-effective and offer an exemplary approach to long-term investment security. As such, the know-how and experience that we have gained over the decades as a global market leader in weighing and precision technology, is truly highlighted in these solutions, which include efficient and cost-effective service models, as provided in the InTouch[SM] Remote Services package.

The bC scale family from METTLER TOLEDO epitomizes this claim to be the most outstanding range on the market – regardless of whether it is used in a specialty butcher's, a health store, a delicatessen or the supermarket.

The perfect choice for successful businesses

Weighing that puts you in the driver's seat: The bC scale family has the perfect weighing solution for you, with its extensive range for a variety of applications.

Fast weighing procedures, a diverse range of optional extras and the ultimate in user-friendliness. The bC scale family operates impressively in each area of application – from weighing in goods receipt, to pre-packing for the self-service shelf and portioning off the shop floor, right through to weighing and taking money at the sales counter.

Scales for all applications and requirements. By choosing the bC scale family, you are opting for a versatile, high-performance solution from a single source – with a perfect connection to goods management and accounting systems. As such, you will save a great deal of time and work, regardless of whether you are maintaining your master data or cashing up on an evening.

Goods receipt
Checkweighing as part of the goods receipt process? This can be performed effortlessly with the bC scales, from small portions to boxes, beef halves and pig halves.

Pre-packing
A second display and self-service counter for customers who are always on the go? With the bC scales, portioning and price marking can be undertaken in the twinkling of an eye.

Sales counter
Weighing without waiting in line. Classic, flat or suspended design. You decide which works best for your store and product range. Do you want an integrated cash collection function? No problem!

METTLER TOLEDO bC scale family –
at home in every department

Produce
Simple checkweighing and rapid self-service weighing with automated labels – the bC scales really couldn't be any simpler for your customers.

Open-air sales
Lightweight housing, wireless network connection and optional cash register function – with bC scales, impressive promotional stands are up and running in no time at all.

Cash register area
Weighing for verification purposes only or a complete solution for weighing and cash collection? Scanning of external goods? No two businesses are the same, so implement the solution which works best for you and your company.

Tried and tested operation
Modern technology

A highly convenient weighing experience and the touch interface of a tactile scale: the bC scale family combines state-of-the-art weighing technology with tried and tested keyboard operation along with a wide range of sophisticated scale functions.

bC scale family

- Diverse range of models and functions
- Modular device concept
- High level of compatibility
- Robust, stainless steel weighing platform
- Easy-to-clean housing
- Ergonomic operation
- Modern, state-of-the-art design

Seamless proof of origin

It is essential that butchers are able to trace the origin of beef in accordance with EU law. The background data is printed on the receipt and label, and is saved in the TAF server.

- Manage batches
- Monitor quantities
- Create legally-compliant documentation

General cash register functions

- Cash register on / off
- Various cash register drawer configurations (with / without permanent access to the drawer)
- Takings / outgoings
- Float
- Cash delivery / cash register balancing
- Revenue elements

Surcharges / discounts

- Percentage / absolute amounts
- Applicable to individual items and total

Pre-order sales receipt

- Pre-order sales receipt number automatic / manual
- Edit / cancel pre-order
- Scan pre-order sales receipt

Goods receipt

- Goods receipt number automatic / manual
- Cancel goods receipt
- Scan goods receipt (goods receipt number encoded in EAN)

- Intermediate / final turnover
- Cash register balance
- Grand total

Hygienic Light Touch keyboard
Simple to label and can be easily removed for cleaning purposes. All bC scales use the tried and tested, non-wearing METTLER TOLEDO Light Touch keyboard.

Simple hygiene
Flat surfaces, protected connections, no unnecessary corners or edges. So nothing stands in the way of your employees thoroughly cleaning the devices by hand at speed.

A swift matchcode procedure
So you haven't memorized the PLU numbers of a new product range? Quickly enter the first letters of the product name, select the right product and confirm. This is also perfect for getting part-time assistants and new staff members up and running.

User-friendly self-service
Are you looking to integrate self-service scales into your business concept? It's no problem at all with the bC scale family. In addition to the special self-service scales, all bC scales master self-service mode perfectly.

Modular and customized.
Weighing tailored to your needs

Price marking at the service counter or an open-air stand at a local festival? The bC scale family makes light work of optimizing devices in line with your working environment and intended usage.

High-speed printer
A wide range of printer options are provided for the bC scales. With a printing speed of up to 125 mm per second, the printers step up the pace of your weighing and operating processes.
- Simple and rapid paper change
- The print head is easily accessible and thereby accelerates cleaning procedures

Linerless printer
Sticking is no longer required thanks to straightforward, reliable bag sealing: linerless printing is hygienic and minimizes the dangers of tampering. Practical for fish and meat: the receipts are waterproof and wipe-resistant.

Versatile double printer
Simply switch between counter service and pre-packing at the push of a button, without having to change the paper roll: the double printer for receipts and labels significantly extends the application options of your bC scale. Quiet times can be used to portion and label produce for the self-service shelf or a second display at the sales counter.
- Two devices in one
- Fewer devices and less space required
- Better utilization of employees and more efficient operational procedures
- No more unnecessary traveling between the shop floor and the lobby
- Its location at the sales counter prevents customers from waiting in line

Individual receipts and labels
Style sheets can be helpful when designing your very own receipts and labels. As such, you can integrate graphics and your company logo, select from a diverse range of font sizes – or even design it from scratch with the user-friendly WYSIWYG software.

Wireless networking (WiFi)

Ideal for special sales at open-air stands, small stores and weekly markets: scale networking via WLAN.

- Reasonably priced and simple to install
- The scales can be placed anywhere

- The site can be changed without any problems
- Simple connection to the goods management system without cabling
- High level of security thanks to the latest encoding standards

Excellent advice. Perfect service.
To see and to be seen

It's not just the numbers that count: Take advantage of the bC scales' modern display technology to promote sales, reinforce customer loyalty and provide your sales staff with an extremely useful tool.

Weighing is just one of this scale's numerous functions. Discover how your weighing display can be used as a display window to increase customer sales. Take advantage of guided texts to provide each and every customer with a consistently high standard of service at the sales counter, regardless of who is serving – the manager or a new part-time assistant. With bC scales, your employees will take on the role of sales professionals in no time at all.

Bright displays
High-contrast, glare-free and easy to read even under the most diverse range of lighting conditions: the impressive feature of the bC scales is their high-quality display technology for representing text, images, graphics and your company logo.

Precise item labeling
Plain text instead of unclear abbreviations: the two-lined item display provides you with enough space for the item name. Unnecessary queries are thus eliminated, as misunderstandings are no longer a concern. It couldn't be simpler to increase customer confidence in your business.

Moving advertisements
The majority of purchasing decisions made in store are spontaneous. This is exactly the reason why you should take advantage of the customer display at the counter to draw customers' attention to current promotions. These are displayed as scrolling text or moving advertizing inserts over several lines. They make ideal clips when the display is not otherwise in use. Advertising couldn't be simpler, and it certainly pays off!

Professional advice
Does the customer have questions about the product? No problem, as the bC scales allow you to store a guided text for each and every item.
- Fast access – just the push of a button
- Suitable for information such as allergens, nutritional values, preparation and recipe tips and proof of origin, among other things
- Increases employees' communication skills and the quality of advice provided
- Text can also be printed on the sales receipt

Accompanying operator guide
When it comes to the bC scales, time-consuming operator instructions are surplus to requirements. Thanks to the accompanying operator guide, even newcomers are quickly acquainted with functions and their operation.
- Interactive operator instructions
- Displays functions/keys for the next operating step
- Fast learning curve
- On-the-job learning: You'll be selling in a matter of minutes

Interactive menu guidance
The high-resolution operator display utilizes all the options of interactive menu guidance. Example of line cancelation:
- Step 1: Browse through the receipt using the "Up" and "Down" arrows
- Step 2: Highlight the item that you wish to cancel
- Step 3: Confirm your selection
- Step 4: The item is now canceled.

The swift route
to excellent results

User-friendly product and master data maintenance, seamless integration into the goods management system and adjustment of devices to the sales requirements in question – all these provide you with fast results in next to no time.

Cash register software
Service, scanning, pre-packing, taking cash – the possibilities are endless, thanks to connections for the scanner, EC terminal and cash register drawer. Complete solutions which take care of all your sales requirements – from counter sales in a specialty store, to delivery service for major clients, right through to hot counters and party services. What's more, this frees up valuable space at the sales counter.

Various payment methods
Cash or EC card? Or for key clients by delivery note with invoice? You specify the payment methods you wish to offer customers. One thing that has proven extremely practical is split payment methods, such as a combination of vouchers and the remaining balance by cash.

Variable discounts
Are you worried about ground meat going off? Does a regular customer want a discount for his bulk order? The cash register software provides you with all the freedom you need to determine prices based on the circumstance and the customer. Alternatively, you are able to define fixed discounts, which can even be combined with time frames.

Comprehensive reporting
Cash register reports and balancing sheets are generated in no time at all, regardless of whether you need them by cash register drawer, consolidated for each branch, or broken down by each employee... It's entirely as you wish. Fast-moving products or slow sellers? What's more, you can perform your evaluations in such a way that they are integrated into your goods management system.

USB memory function
Simple, practical, fast: copy product prices or configurations from a master scale to additional scales by means of a USB stick.
- USB stick replaces PC
- No PC experience needed
- Fast balancing with goods management
- Ideal for branch management
- Extremely reasonably priced

Integrated customer management
With cash register software including: user-friendly maintenance and management of customers who use delivery notes – with delivery address and all the essential contact details such as telephone numbers and contact persons.

Efficient branch management
Make well-informed decisions, be the first to reap the benefits of new developments. With METTLER TOLEDO's MTWS32 goods management system, you are provided with all the instruments you need. Alternatively, simply integrate your bC scales into your existing solution.

Convenient data management
Regardless of whether it is departments, product groups, items, sellers or prices, METTLER TOLEDO's MTWS32 goods management system offers impressive, convenient data management and flexible task scheduling, allowing you to automate processes such as data transfers and evaluations.

bC store scales
The range at a glance

bC-U2 counter scale
The versatile all-rounder at the service counter. Thanks to the double printer, switchover between labels and sales is simple with no paper changing involved. Quiet times can be taken advantage of to conveniently mark prices.

bC-C2 compact scale
Flat design, which takes up minimal space: the bC-C2 compact scale does not create a barrier between you and your customer and at the same time provides your staff members with swift access to products on the sales counter.

bC-R2 weighing/cash register terminal
Multifunctional. Convert the bC-R2 terminal into a scale for 3 to 6,000 kg with an external load plate or create a high-performance cash register environment with the cash register software.

bC-U3 self-service scale
Self-service scale with keyboard layouts featuring 25, 50 or 100 keys as standard. Pictograms can be stored.

bC-U4 self-service scale
Self-service scale with 180 assignable keys for the presentation of large product ranges. Pictograms can be stored.

bC-H22 hanging scale
Ideal for fish counters and stands with limited space. The slimline design allows for constant eye contact with your customer. The receipt is printed below shoulder height, so wet sleeves are now a thing of the past.
